

START HERE

PET + COLOR QUICK START

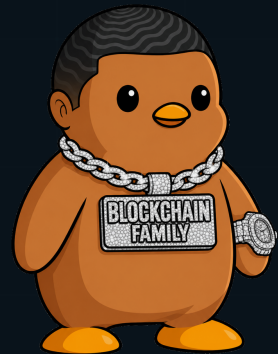

One small action per page. About 5 minutes.

Ak (Ack)

Rell

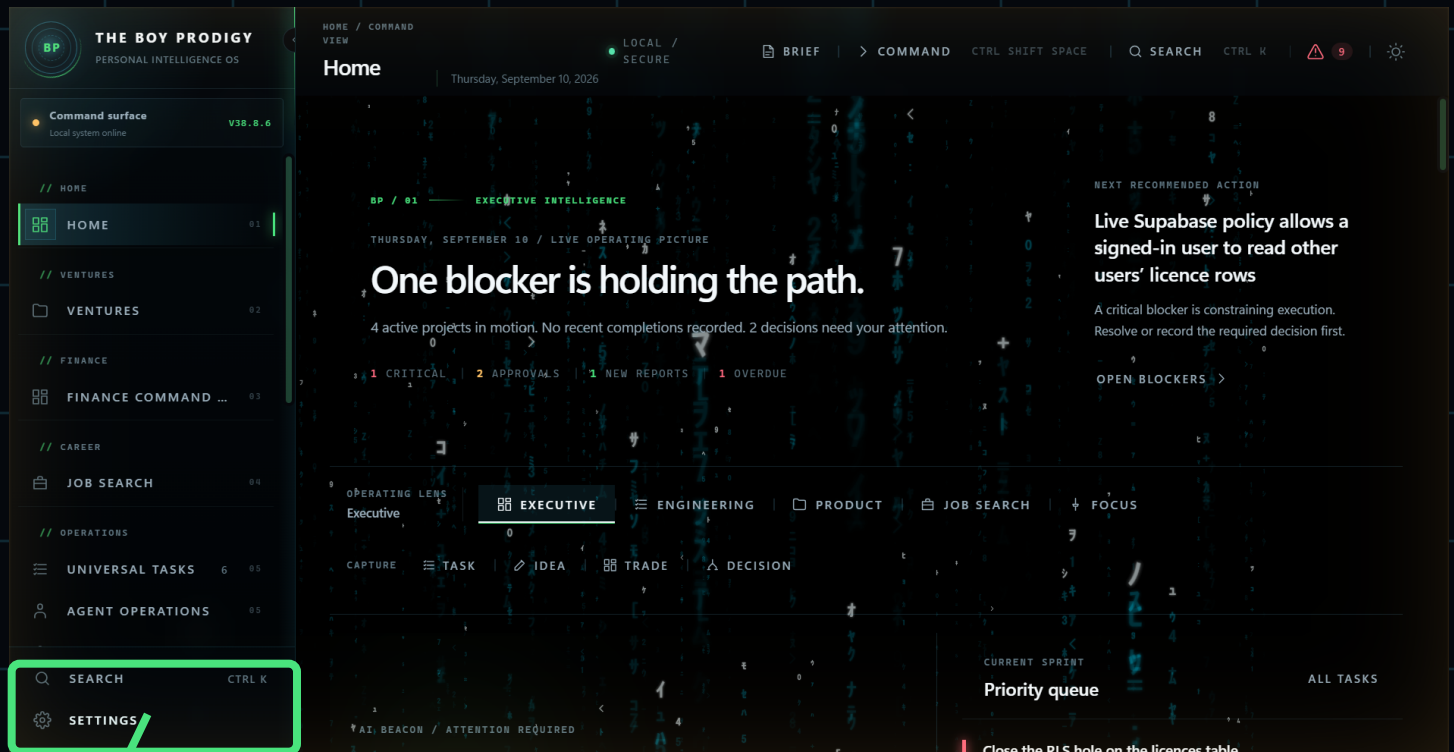

Pat

DO ONE PAGE, THEN PAUSE

01

Open Settings

Click SETTINGS at the bottom-left of the app.

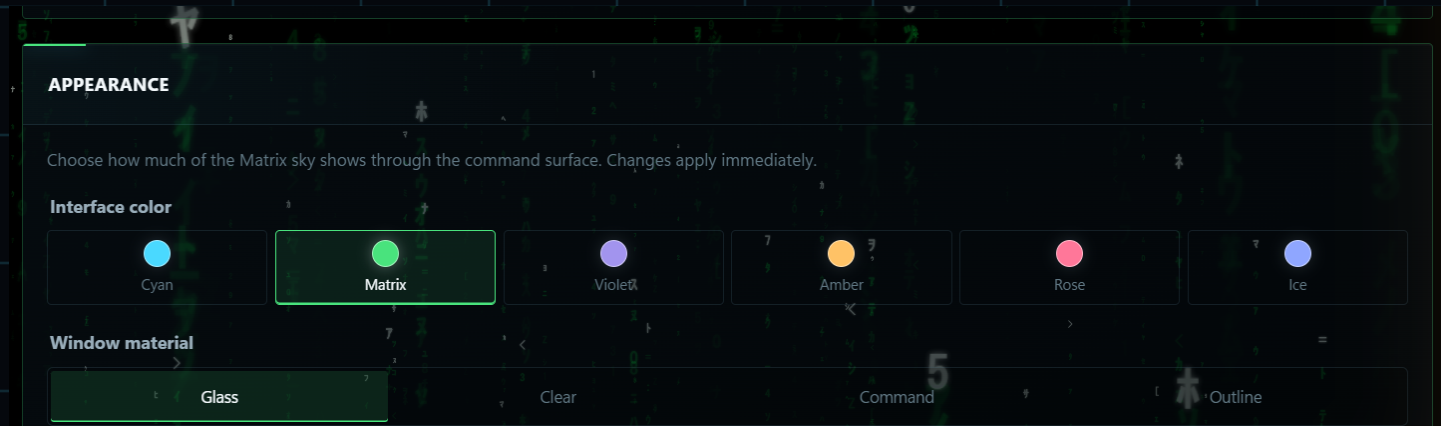

CLICK HERE

STOP WHEN SETTINGS OPENS

02

Choose your interface color

This changes the app glow. Rain color stays separate.

CYAN

MATRIX

VIOLET

AMBER

ROSE

ICE

Tap a color. It saves automatically.

You can change it again anytime.

03

Choose and show your pet

Stay in Settings. Scroll down to COMPANION.

Ak (Ack)

Rell

Pat

1. Open SKIN

2. Pick a name

3. Press SHOW IT NOW

04

Move it anywhere

Press on the pet, hold, drag, then release.

THE PET CAN REACH THE FULL USABLE SCREEN

A fast downward drag triggers the falling and landing motion.

05

Read the pet's signals

You do not need to memorize everything.

CALM

Blinking, breathing, small idle gestures

WORKING

Leans and reacts while the system is active

NEEDS YOU

Waves and shows an alert near its head

FAILED

Red signal means an action needs review

ORANGE OR RED = LOOK AT THE ALERT

06

Hook it to your workflows

The pet side is ready. Your workflow sends a state and alerts.

What your connection must send

1. Activity: idle, active, busy, blocked, or failed
2. Alert text and where it should open
3. Only permissions the owner already approved

READY FOR MCP + A2A WORKFLOW EVENTS

Take screenshots after you choose the final pet and color.

07

Make your own pet with AI

Keep one character consistent. Change only the pose.

1. START IMAGE

2. WATCH

3. WAVE

4. REST

TELL YOUR AI:

Use this character without redesigning it. Make transparent frames for idle, watch, scratch, wave, rest, and urgent. Keep the same body, face, jewelry, size, lighting, and foot line in every frame.
